At that time, new wells or septic fields will not be permitted and property owners will be required to connect to the existing water line and/or sewage collection line. In addition, unused wells must be capped in a safe manner and septic fields must be properly abandoned to Randolph County Health Department standards. Improper abandonment of septic systems will be considered an illicit discharge as regulated by the City of Archdale Stormwater Management Program Ordinance.

- (e) Separate water and sewer connections are required for each structure. However, exceptions will be considered on a case by case basis for multi-family housing arrangements, motels, hotels, schools, and other similar establishments.

- (b) Bills for water and sewer will be figured in accordance with the City's published *Schedule of Fees* then in effect and will be based on the amount consumed for the period covered by the meter readings.
- (c) Charge for active service accounts only, commences when meter is installed and connection made, whether used or not.
- (d) Meter readings for irrigation systems will appear as a separate line on the customer's bill. Compound meters will be billed as one service. All other readings for meters will not be combined for billing.
- (e) Bills are due when rendered. Due dates, penalties, and cut-off information are listed on monthly statements.
- (f) Failure to receive bills or notices shall not prevent such bills from becoming delinquent or relieve the consumer from payment.
- (g) The property owner is responsible for all water and sewer charges when water usage registers on the meter reading, even if the property is listed as vacant.
- (h) The City Manager shall have the authority to establish administrative procedures for short-term credit extensions where there is a documented short-term inability to pay.
- (i) The City may engage collection agencies, at the discretion of the City Manager, in order to enforce the payment of delinquent accounts. The consumer shall be obligated to pay all costs associated with third-party collection efforts prior to having service resumed at the same location or a new location.
- (j) Adjustments shall be made to correct clerical and/or computer errors on bills. If a customer is incorrectly billed, not billed, or a bill is sent to the wrong party, the City may back bill the customer for the lesser of the actual period or a 2-year period for water and sewer charges. Similarly, in the event customers are charged for services not received, a credit adjustment will be allowed only for amounts paid by the customer for charges incurred within the prior 2-year period. Refer also to the *Utility Customer Service Policies and Procedures*.

Sec. 10-15. Suspension of Service

- (a) When services are discontinued the deposit will be applied to the final bill and the remaining deposit will be refunded to the account holder at last known address, provided the refund amount exceeds \$3.00.
- (b) Irrigation meters may be removed at no charge upon the customer's request. However, as established in the *Schedule of Fees*, a reinstatement fee will apply should the customer subsequently request a new irrigation meter.

- (c) Upon discontinuance of service for nonpayment of bills, the deposit will be applied by the City toward settlement of the account. Any balance will be refunded to the consumer; but if the deposit is not sufficient to cover the bill, the City will proceed to collect the balance in the usual ways provided by law for the collection of debts.
- (d) Service discontinued for nonpayment of bills will be restored only after bills are paid in full, redeposit made, and a non-payment charge made for each meter reconnected.
- (e) Accounts in the name of a deceased customer must be transferred into the name of a spouse, other family member, executor of the estate, or administrator of the estate to avoid disconnection of service.
- (f) The City reserves the right to discontinue its service without notice for the following additional reasons:
 - (1) To prevent fraud or abuse.
 - (2) Consumer's willful disregard of the City's policies.
 - (3) Emergency repairs.
 - (4) Insufficiency of supply due to circumstances beyond the City's control.
 - (5) Legal processes.
 - (6) Direction of public authorities.
 - (7) Strike, riot, fire, flood, accident, or any unavoidable cause.
- (g) It shall be unlawful to turn on water, tamper with, obstruct, rearrange, or interfere in any manner with any public or private fire hydrant, water meter, or water connection on which City water pressure is maintained, or any sewer connection, manhole, or pipe in connection with the City sewer system.
 - (1) The person in whose name such meter is installed or the person(s) so using or receiving the benefits of unmetered, unregistered, or diverted water will be liable for enforcement actions resulting from the unlawful actions cited in (f) above.
 - (2) Persons in violation of this section will be prosecuted as set forth in NCGS 14-151.
 - (3) The City may, in addition to prosecution by law as provided in NCGS 14-151, permanently refuse service to any consumer who tampers with a meter or other measuring device.

Sec. 10-16. Complaints - Adjustments

- (c) Test operations to establish the rate of the flow of water available from fire hydrants by personnel of the GRFD, a registered Fire Department, or authorized personnel of the City Public Works Department. These test operations may include the testing necessary to furnish data needed for fire insurance evaluations or engineering evaluations of the effectiveness of the water system.
- (d) Water flushing and collecting of water samples by authorized City Public Works Department personnel for improving or determining the quality of water in the City water system, or to minimize the possibility of impurities remaining in the water system from breaks, leaks, or repairs to the water system.
- (e) Water withdrawal from publicly owned fire hydrants by authorized City personnel for street maintenance, street cleaning, dust control, landscaping of City property, or cleaning of sanitary or storm sewer lines.
- (f) Water withdrawal through a City of Archdale approved hydrant meter water account using a Hydrant Meter Assembly issued by the Public Works Director ("Director"), or his/her authorized agent, as defined in this Policy.

- (c) "Business day" shall refer to a single calendar day in which the City of Archdale Customer Services Department is open to receive citizens for transactions and other utility customer services. Saturdays, Sundays, and legal holiday closures established by the Archdale City Council are excluded.
- (d) "Director" shall refer to the Public Works Director or his/her designee.

Sec. 10-20. Enforcement of Policy

Any person who opens, closes, damages, tampers with, connects to, or withdraws water from a City fire hydrant in a manner that does not fully comply with the provisions of this Policy shall be subject to one or more of the following enforcement actions, depending on the severity of the adverse consequences and the previous history of similar occurrences:

- (a) Assessment for the value of the water withdrawn from a fire hydrant based on the City's retail rates in effect at the time;
- (b) An assessment for the value of the City's cost of repair of damages to the water system, including damages to the Assembly;
- (c) An assessment for the value of court costs, attorney fees, or other administrative costs for claims consequential to acts prohibited by this Policy;
- (d) A civil penalty issued by the Director of up to five-hundred (\$500.00) dollars per violation;

 - 3. Estimated volume of water required per month, or estimated total volume required if period of time is less than one month;
 - 4. Size of Assembly requested (must be a size provided by the City, as defined in the *Schedule of Fees*);

These rates may apply where the water consumption of the residence or other approved user is generally no more than that of a one family residence. The Public Works Director shall determine whether the customer will be on the minimum or higher flat rate or whether a meter is to be installed to determine the sewer service charge and he shall set the amount of the charge based on estimated consumption. Metering may be required where water is used for industrial purposes or where monthly or yearly discharge of waste water to the sanitary sewer system fluctuates over a wide range.

A flat rate shall not be used where the water supply is from a State approved public water supply.

Sec. 10-28. Polluted Water; Control

All polluted water from homes, commercial establishments and manufacturing plants, whether such water is obtained from the City of Archdale or not, when polluted by its use, shall be forced into the City's sanitary sewer system provided such wastes meet the requirements of this chapter.

Where an objectionable or offending condition shall exist, as determined by the Director, the person causing the discharge will immediately take corrective measures to remove or otherwise eliminate the offending condition in a manner approved by the Director. In any unusual circumstances where an imminent threat to the health and safety of the public may deem to exist, or where corrective measures are not taken promptly by the person causing the offending condition, the Director may then take such steps as he determines necessary to remove the polluting materials and eliminate the offending condition with such costs to be borne by the person causing such condition.

Sec. 10-30. Prohibited Use of Public Sewers

No person shall discharge or cause to be discharged any storm water, surface water, ground water, roof run-off or subsurface drainage into any sanitary sewer. Storm water and surface drainage shall be admitted to only such sewers as are specifically designated as storm sewers or storm drains. - (e) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Director in compliance with applicable State or Federal regulations.
- (f) Any waters or wastes having a pH lower than 5.5 or higher than 9.5 which also have some demonstrable property capable of causing damage or hazard to structures, treatment processes, equipment or personnel of the sewerage system.
- (g) Any waters, except as hereinafter provided in Sec.10-30, which have the following characteristics:
 - (1) A BOD greater than 300 mg/l or,
 - (2) A SS greater than 250 mg/l.

- (a) Controlling the Discharge of Runoff from One Property to Another Property.

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering consideration. Larger floods can and will occur. This ordinance shall not create liability on the part of the City of Archdale or by any officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made hereunder.

(h) Penalties for Violation

Violation of the provisions of this ordinance or failure to comply with any of its requirements, including violation of conditions and safeguards established in connection with grants of variance or special exceptions, shall constitute a misdemeanor.
